

Johns Hopkins Medicine

Rehabilitation in Transverse Myelitis

Barbara J. de Lateur, M.D., M.S.
Professor,
Department of
Physical Medicine and Rehabilitation

Rehabilitation in Transverse Myelitis

Goals

Principle

Strategies and Tactics

2

Rehabilitation in Transverse Myelitis

Goals

3

Rehabilitation in Transverse Myelitis

**Goal: Preservation or
Restoration of
Optimal Function**

4

Rehabilitation in Transverse Myelitis

**Goal: Preservation or Restoration
of Individual Autonomy**

5

Rehabilitation in Transverse Myelitis

**Goal: Preservation or Restoration
of Patient's Rôle in the
Family and Society**

6

Rehabilitation in Transverse Myelitis

Principle

7

Rehabilitation in Transverse Myelitis

**Principle:
Anticipatory Management**

8

Rehabilitation in Transverse Myelitis

Rehabilitative Strategies

9

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Primary Prevention**

10

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Reduction of the Pathology
to a Minimum**

11

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Prevention of Secondary
Complications**

12

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Enhancement of Function
of the Affected Systems**

13

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Enhancement of Function
of the Unaffected Systems**

14

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Compensatory Tactics**

15

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Use of Assistive Technology**

16

Rehabilitation in Transverse Myelitis

**Rehabilitative Strategies:
Psychological or
Learning Techniques**
